FOR IMMEDIATE RELEASE

WINNERS OF THE 37TH ANNUAL IALD INTERNATIONAL LIGHTING DESIGN AWARDS REVEALED

CHICAGO, IL USA, 18 JUNE 2020 | Luminaries of the lighting profession gathered online for the first time to honor the winners of the 37th Annual International Association of Lighting Designers (IALD) International Lighting Design Awards, presented by Cooper Lighting Solutions, the longest running and one of the most prestigious lighting design awards programs in existence. Twenty-one projects were on display from 8 countries—including exteriors, interiors, universities, museums, retail, and places of worship. This year’s winners represent some of the most innovative and inspiring architectural lighting design work found anywhere in the world.

IALD Awards Co-Chair Morgan Gabler, IALD, commented, “Every year we see an increase in the quality of entries and this year is certainly no different. Our seven-member panel of judges evaluate each project submission for demonstration of excellence across ten distinct areas in a rigorous and blind process.” IALD Award Co-Chair Mirjam Roos, IALD, added, “Projects recognized go beyond distinction in architectural lighting—we honor exceptional designs that evoke emotional responses, transform spaces, inspire awe, and bring real benefits to end users.”

The highest point score winner across all entries, in addition to receiving an Award of Excellence for their project, received the IALD Radiance Award for Excellence in Lighting Design, the highest honor in architectural lighting design. This year, the IALD Radiance Award for Excellence in Lighting Design award goes to Arup UK for The University of Sheffield Concourse in Sheffield, England UK.
