LAKEWOOD CEMETERY GARDEN MAUSOLEUM HONORED WITH IALD AWARD OF MERIT
LIGHTING DESIGN BY HGA ARCHITECTS + ENGINEERS

PHILADELPHIA, PA USA, 24 APRIL 2013 | Ten award winners representing architectural lighting design projects from nine countries—the most diverse group of projects in recent memory—comprise the winners of the 30th Annual International Association of Lighting Designers (IALD) International Lighting Design Awards, recognized at a presentation held 24 April at the Crystal Tea Room in Philadelphia, PA USA. Of the ten projects recognized, one entry earned a Special Citation, six earned Awards of Merit and three earned Awards of Excellence.

The design for the new 24,500ft² Lakewood Garden Mausoleum recognizes that in contemplating death – as in life – people have diverse perspectives. It respects that individuality, human scale and a connection to nature are paramount. Seamlessly integrated into the architecture and HVAC, the lighting design artistically highlights the architectural forms, enhances the physical characteristics of the materials, and uses light and shadow to heighten the spiritual qualities of the space.

“The highlighting of materials and coordination with the architecture was perfect,” one judge stated.

Because the building is primarily used during daylight hours, the artificial lighting serves to balance the abundant daylight from the windows and skylights while creating an intimate environment when daylight fades away.

The International Association of Lighting Designers (IALD), established in 1969, is an international organization supporting a network of 800 lighting design professionals who satisfy its rigorous qualification process. Its members are distinguished by a unique blend of aesthetic and technical expertise, and operate at the highest level of integrity to create a better world through leadership and excellence in lighting design; to cultivate the universal acknowledgement and appreciation of the Power of Light in human life.
