ONE PROJECT RECEIVES SPECIAL CITATION AT 32ND ANNUAL IALD INTERNATIONAL LIGHTING DESIGN AWARDS

NEW YORK, NY USA, 5 MAY 2015 | Fifteen award winners representing architectural lighting design projects from six countries comprise the winners of the 32nd Annual International Association of Lighting Designers (IALD) International Lighting Design Awards, recognized at a presentation held 5 May at Gotham Hall in Las Vegas, NV USA.

In addition to ten Awards of Merit, four Awards of Excellence and the prestigious Radiance Award, the IALD distributed a Special Citation to one notable project at the awards dinner, which also served as a fundraiser for the IALD Education Trust.

#MORE#
Light Garden is a permanent interactive landscape of light, sound and experience that transports visitors of all ages into a magical world full of childhood fantasies. Inspired by stories from Lewis Carrol and J M Barry, Light Garden incorporates a playful combination of suspended flowers, projected floor petals and surreal sounds. Colorful shapes bounce off the glossy floor creating three-dimensional patterns of light; and an interactive controls system allows the installation to be influenced by the people moving through the space.

“This project taps into the child in all of us,” one judge shared. “We loved that the designer focused on a single, clear concept. This project encourages the best types of community and public interaction.”

The IALD Lighting Design Awards program, established in 1983, honors lighting projects that display high aesthetic achievement backed by technical expertise. Additionally, projects can also be submitted for consideration in the sustainable design award category, which means the project undergoes an additional round of judging keyed solely to the fulfillment of sustainable design principles. A panel of award-winning lighting designers, architects and interior designers review the projects.

The International Association of Lighting Designers (IALD), established in 1969, is an international organization supporting a network of more than 1,200 lighting design professionals who satisfy its rigorous qualification process. Its members are distinguished by a unique blend of aesthetic and technical expertise, and operate at the highest level of integrity to create a better world through leadership and excellence in lighting design; to cultivate the universal acknowledgement and appreciation of the Power of Light in human life.
